Bergeron Store Gutted by Fire Yesterday A. M.

Mr And Mrs Bergeron Had A
Narrow Escape

Damage to the extent of about \$4000 was done to the building and contents in the fire which broke out in the Bergeron store on Broadway, early yesterday morning. The stock and fixtures in the store and the household effects and clothing in the living quarters were a total loss estimated at about \$5000 and the damage to the building is estimated at \$1000. The contents were partially covered by insurance.

The origin of the fire is a mystery but it is presumed that a lighted cigarette stub dropped on a couch may have been the cause.

Mr and Mrs Bergeron were awakened about 2 a.m. and the fire had gained such headway that they escaped with only what clothing they could grab on the way out of the building. Practically nothing in either the store or living quarters was saved. The inside of the building and part of the roof are a total wreck.

Although the fire had spread all over the building before the alarm was sounded the firemen had it well under control in a very short time, after arriving.

Mr and Mrs S. Paterson, of Leduc, were guests of the former's brother Mr A. Paterson and Mrs Paterson last week-end.

Mr and Mrs E. Todd were seen in carrying off first prize in a black modeling at the Calgary Exhibition this week.

Miss Hughes of the Medicine Hat General Hospital staff and Mr and Mrs J. W. Campeau of Sunday.

Redcliff football girls play the Royals in Medicine Hat on Friday evening of this week. The best game of the season has played with this team last week.

Several drownings are reported from all parts of the water during the past week. Bathing should be well advised to keep away from the river especially when it is so high and treacherous.

Notes for the approaching Dominion and Provincial elections are still guess work. The latest prediction is that the Alberta election will be on or about August 10th and for the Leduc election about Sept 24th.

The Lethbridge Herald is to be issuing a special edition to celebrate the golden jubilee of the city. The editor will have 124 pages reviewing the development of that part of the province in the past half a century.

Several bad hail storms are reported in the southern part of the province during the past week. The worst was around Oliver, Collier and Kushn. Arthur Kimball there was heavy frost leaving beans, potatoes and other tender plants black.

Swimming Pool is Being Well Patronized

Continuance Will Depend On
Sale of Tickets

During the hot weather last week and so far this week the swimming pool has been greatly appreciated and well patronized by the young folk as well as many other ones.

The pool is now in splendid condition under the supervision of Mr. A. P. Johnson who takes a keen interest in the children and looks after them in a fatherly manner.

Season tickets for the pool were issued and may be secured from Mr. Paterson at the pool. Those who have children attending the pool and all other citizens who are interested in providing the children with the much needed pool in our town, are requested to purchase tickets as soon as possible. It depends much on the sale of tickets as to how long the pool can be kept in operation.

Redcliff Girls Win From New Club

The Game Was Won In The
First Innings

Redcliff softball girls took the New Club girls into camp last Monday evening to the tune of 11 runs to 9. The game, however was nothing like what the score would indicate.

Except for the first innings the game was closely contested and the visitors had slightly the best of it so far as runs were concerned. If the home girls had not started the merry-go-round in their half of the first the result would have been different, as the visitors scored 16 in the first innings.

With 14 of a lead in the first inning the local girls got reckless and took too many chances. Base running, which furnished the visitors with an opportunity to make several double plays, thus cutting down the score.

In their half of the first they batter up for Redcliff scored a run and six of them scored twice before the side was retired. They didn't score again until the seventh and eighth when 3 crossed the plate in each of those innings.

After the first the visitors tended down and played a constant game scoring in 6 of the other 8 innings.

New U. F. A. Local
Formed at Lake Valley

Have Ten Members And Expect
More To Join

A new U. F. A. Local was organized at Lake Valley on June 19th with ten members. It is expected that more will join at their next meeting to be held on July 17th.

The following were elected: Dep. President, Bowell; A. M. Day Vice Pres. Bowell; D. Whitney Secretary Redcliff; Directors: Adm. Dubeau, Redcliff; Ed. Lupp, Redcliff; C. Henry, Suffield; Ole Olsen, Bowell.

H. H. Stevens Launches New Political Party

Will Be Leader of Group to
Contest Federal Election

Canada has new political party today, a party without a name but fully equipped with a leader, a policy, a provincial executive and followers throughout the country. The leader is Mr. H. H. Stevens from a conservative minister of trade and commerce and the policy is the program he has been advocating for the past year or two.

Mr. Stevens took political action by surprise Monday when he announced he would lead a new force at the coming general election although in view of his differences with his fellow Conservatives some statement from him was expected.

The Stevens party will fight the election battle on all fronts he announced. It will place candidates in all constituencies and Mr. Stevens will conduct a coast to coast campaign. Its name and platform will be announced within a week.

A battle for the rights of the "forgotten man" will be waged by the Stevens organization, a former Conservative member promised.

His backers consisted of a firm main groups workers, farmers, merchants, the "white collar class" and small manufacturers of whom we were opposed to government in the interest of the great corporations.

Premier Bennett said again that he would not dump Canadian wheat surplus on the market or to offer it at fire-sale prices.

Mr. Freeman a member of the Utilities Commission, is in town today sitting as a court of revision to hear the complaint of Frank Jeric regarding the assessment on his farm property in this school district Mr. Jeric's assessment was reduced slightly.

St. Andrew's

ST. MARY'S CHURCH

Mass will be celebrated on the 3rd Sunday of each month at 8:30 a.m.

HON. H. H. STEVENS
Minister of Trade and Commerce in the Bennett government, who has announced his acceptance of the leadership of a new political party.

Hail Destroys Crop on D. Whitney's Farm

Wind Blows Down Windmill
And Small Buildings

During the heavy rain storm which passed over this district last Saturday, D. Whitney's crop was completely hauled off. The hail was accompanied by a high wind which blew down his windmill and several small outbuildings. Several windows were broken by the hail.

His garden stuff was badly battered and a number of chickens were killed. The hail was as large as small crab apples.

A small section of A. J. Wheeler's crop was also damaged by the hail.

We have just learned that the hail also struck Joe DeLac's farm near Bowell and badly damaged his crop.

Italy Warns Britain: Hands Off Ethiopia

Have Concern For Future
League of Nations

London and Paris accepted a warning from Italy and Ethiopia as inevitable, although the British government still hoped for some 11th-hour development that would avert hostilities.

Italian newspapers on the eve of the important meeting of the British cabinet and the hosts of common debate, warned Great Britain to adopt a hands-off policy in the dispute with Ethiopia.

The semi-official Giornale d'Italia reminded Great Britain she is mistress of half the world and should not deny to Italy a place in the sun, especially when Italian aims do not menace British interests.

Grave concerns for the future of the League of Nations and security system was expressed by the whole laborious collective of both the British and French capitals, as diplomatic efforts to settle the dispute reached a complete impasse. This was heightened by a report Ethiopia would demand immediate recognition of the league council.

Popular Redcliff Lady Married Last Thursday

Cooper — Moore

Gordon Memorial church was the scene of a very pretty wedding last Thursday evening at 7 o'clock when Miss Margaret Moore, daughter of Mr and Mrs Richard Moore, and one of Redcliff's most popular young ladies, were united in holy wedlock to Mr Howard Cooper, of this town. Rev R. E. Pow officiated.

The bride entered the church in the strains of Lohengrin's wedding march played by Mrs. Truchholz and looked her prettiest in a wedding veil decorated with orange blossoms and carrying a large bouquet of pink roses. The bride's sister, Miss Jean Moore, dressed in a gown of peach candy and carryings. A quartet of mellow sweet voices acted as bridesmaids. Mr B. Thacker acted as best man.

During the signing of the register Miss Shaw and Mrs. M. B. Buchholz sang a very appropriate duet.

A reception was held in I. O. O. F. hall after the ceremony. A number of friends and relatives assembled and a most enjoyable social hour was spent during which a buffet lunch was served, and an entertainment of music was carried out.

Mr and Mrs Cooper have taken up residence on Sixth St.

Bingville Annual Picnic Was Great Success

Was Well Attended And Had
A Good Program

Bingville's annual picnic, held last Saturday, proved most successful despite the heavy rain which fell during the late afternoon. The picnic was well attended, among whom were a number of former residents of the district who came long distances for the event.

A good program was conducted during the afternoon. It featured a number of races and games for the young folks. An interesting feature of the day was the baseball game between Jenner and Bingville in which the visitors won out by a narrow margin.

The hall was taxed to capacity to accommodate the large crowd which attended the dance in the evening and it was one of the most successful and enjoyable social events ever held.

Despite the heavy expense the committee will have a tidy balance on the right side of the ledger.

HOPPER STATION IN MEDICINE HAT

The Alberta Government's Hopper station for Grushopp is now open in Medicine Hat with H. McPhail, district agriculturist in charge. Farmers are urged to take advantage of the opportunity as soon as feasible to cope with the hopper nuisance.

The station is located in R. A. warehouse on Allowance Ave.

There was no meeting of the Town Council last Monday evening as several of the council members are on night duty and a meeting did not turn up.

Grain Board Bill Passed by Dominion Govt.

Minimum Price For Wheat
Will Be Set

Canada is to have a Grain Board set up somewhat different from the original contemplated by the Dominion Government. The parliamentary committee appointed to consider the matter arrived at a decision to recommend the setting up of a board, delivery of wheat to which would be optional on the part of the wheat grower. A minimum price for wheat will be fixed and any wheat grower who so desires may dispose of his wheat to the board receiving therefor the minimum price. A nonnegotiable certificate which entitles him proportionately to any further minimum price above the minimum price, received for the sale of the wheat.

The alternative method of marketing is through the regular trade channels when all of the obtainable price is paid at the time of the transaction. The Winnipeg Grain Exchange will operate as usual, subject of course, to the influence of the minimum price. The board will take over McFarlane's holdings of around 225 million bushels, and dispose of it as demand arises. The minimum price will be set at the commencement of the crop year — August 1st or thereabouts.

The board will have power to make investigations into the operation of the Winnipeg Grain Exchange when it is deemed necessary.

The board's appointment will be a permanent one until eliminated by an act of parliament.

New Rules Governing Marriage Licenses

Health Affidavits Required In
All Cases

New regulations governing the issuing of marriage licenses are set down by the Solicitor General of Marriage Act in Alberta to become effective last week and are attracting wide interest.

An affidavit of health, testifying to freedom from venereal disease and tuberculosis, on the part of both bride and groom, is required in every case.

The applicants are reminded that severe penalties will be levied on persons found to have married knowingly suffering from either of the diseases mentioned.

Most interesting of the changes affects "underage" applicants. Unless they are accompanied by their parents (or guardians) who personally give their consent in the presence of the issuer, persons under 21 may not receive a license until after the expiration of three days following date of application. This ruling applies even when the written consent of the parents is furnished.

Hon. F. B. Baker, Minister of Education, was again the unanimous choice of the U. F. A. convention held at Whittier. There will be two other candidates in the field, a Liberal and a Social Credit.

Serve the Best Tea

Vacation Days

That happy period in childhood, the mid-summer school holidays, is near at hand. With shouts of joy, laughter, and on running feet the boys and girls of Canada will announce to all the world "School's out!" and they will toss their books aside to be forgotten for a couple of months.

In these latter days much is heard of dorking working hours, more leisure for the workers of the world, and all kinds of proposals are advanced as to how these leisure hours may be spent in order that they may prove a blessing rather than a drawback in the development of a better type of citizen; in order that they may add to the pleasure and true enjoyment of life rather than tend towards pure idleness and even shiftlessness.

Now, with two months of absence from school for their children, what are Canadian parents planning for these energetic boys and girls, to be sent out to mischief and to make this vacation time freed from study wholly beneficial and an asset which will prove of value in better health, clearer minds, and a most wholesome outlook on life—in a word, prepare these citizens of the future to return to the school rooms some weeks hence keen for another period of study and preparation for life?

Older boys and girls are already home from college, annual church conferences and assemblies have been held, nurses' graduation from hospitals are completed, examinations of all kinds are nearing an end, teachers, too, will be free of their duties, spring work on the farm is past, and in town and city the quiet time in business is at hand. Thus the older generation is able to devote more and more thought to making these happy days of childhood a real joy and blessing not only to the children but to themselves.

And so the question arises, and ought to be faced, what can we do to individually and collectively make the summer of 1935 a most profitable and to-be-forgotten period in the lives and memories of Canada's boys and girls—your own boys and girls? It is a responsibility to be discharged, just as it is a pleasure to be derived by those who discharge the responsibility. And this combined responsibility and pleasure for parents, and unalloyed pleasure for children, should not be neglected this year especially, following, as it does, so many years of economic depression and, for many in this western country, disastrous crop failures and business reverses.

Fortunately, it does not cost much in money to give children a good time, a happy holiday. Fortunately, again, Canada is blessed by nature with almost innumerable beauty spots for holiday purposes. There is not a province in Canada which does not have lakes, large and small; summer resorts and camping grounds are numerous, places to camp and picnic are to be found in easily accessible places. Full advantage should be taken of these to provide outings for the boys and girls, even though individual circumstances may make such outings of brief duration.

In summer time especially Canada is a land for out-of-doors. Get the boys and girls out into the open, and keep them there as much as possible. They are in school rooms and shut up in houses in the winter time for long months of the year; they need the health-giving properties of the sun throughout the summer holiday season, the clean, invigorating fresh air, the delights of forest and lake. Get them as close as possible to Nature in her happiest moods and most beautiful dress.

And make these vacation days of lasting benefit to your boys. See that the boys and girls are taught to swim. It is little less than a crime that so many Canadian boys and girls never learn to swim, and so many tragedies result which are so easily preventable. The art of swimming should be a part of every child's education. It is not only one of the best forms of exercise, making for the development of muscle; it is not only a source of great pleasure; but it is a preparation for emergencies that may arise in their own lives or in the lives of others.

Unconsciously, too, the work of the school room can be carried forward. Moments of observation can be developed and strengthened during vacation days spent in the open; habits of cleanliness, neatness, orderliness, can be made a part of camp and holiday life, and accepted as a part of the fun, which will stand children in good stead in future years; initiative, ideas in handicrafts, resort to simple invention to meet the lack of usual equipment at home—all these things mean a greater all-round development of character.

An elaborately organized holiday is not necessary, neither should much expense be entailed. Get out with the children and rough it for a while. They will enjoy it just as much, perhaps more, than an expensive trip or outing where everything is planned and arranged for them. To a large extent, the boys and girls should do a fair share of the camp or holiday work. Properly organized and time systematically divided between these duties and the hours of play, boys and girls will enjoy and benefit from doing the camp chores.

Forget the motor car occasionally, and spend a day on a hike. Older lads know the delights and benefits of a walking tour, or a day's hike, which Canadians have not learned to appreciate. Try one this year with your older boys and girls.

Think up other things and ways in which this holiday season can be made happy, healthful and useful. Vacation days present an opportunity to get closer to your children than is possible in the busier days of the year. It is an opportunity for you to study them; ascertain their weaknesses, or strength; gain their confidence in larger measure; learn of their ambitions, and as a result be in a better position to steer their characters along right lines, and check tendencies and habits ill-bred in them, which would prove a handicap to them, and a possible source of future worry and sorrow to yourself as well as to them.

Problem For Astronomers
Mars, where weather extremes are almost an hourly matter and life-giving oxygen is virtually non-existent, has presented a new problem to the astronomers of this world by producing what seems to be more out of season.

Pupils in the middle grade of schools in China have been ordered to take military training.

Lloyd's Insure Vimy Pageimage

Stress Necessity of Making Early Bookings
The Canadian Legion announced today that Lloyd's of London, England, have insured the Vimy Pageimage, to be held in July of next year, against abandonment in the event of war, financial panic or other untoward events.

Bookings are pouring into the steamship companies. Hope is expressed by Legion officials that service men realize the necessity of registering early in order to be certain of accommodation.

"It is difficult to impress a veteran with the idea of making a ten dollar deposit now when he knows he can pay the full hundred and sixty dollars when the time comes," said Captain Ben Allen, Dominion organizer, to the press today. "Early bookings are necessary, however, so we can get enough ships to take care of the thousands who intend going."

"And pilgrims who are going to be allowed to sail in this Peace Armada. Also we must arrange early for billeting accommodation and rail and motor transportation in France. The naval, military and authorities in France, Belgium and England are extending us every co-operation. It took the Canada's year in Europe next year."

Held Up By Robin

Nesting Bird Delays Altering Of
Huge C.N.R. Signs
Plans to alter a huge electric sign from the Canadian National Railway in Winnipeg were thwarted out of consideration for a mother robin whose nest is attached to the letter 'r'.

Working of a new sign designed to replace the old had been carefully worked out. Plans were made, money raised and all was in readiness to flash out the attractions of summer excursions. Then office workers who had been sitting on her four legs decided to officials, and it was decided, excursions or no excursions. Mrs. Robin must not be disturbed. Mainstream efforts were being made to get out a sign which would leave the "r" in its present place.

Latest Life-Saving Net

Device For Use At Sea Was Successful

An ingenious life-saving net which experts state will minimize perils of the sea has been demonstrated at a Cardiff ship-repairing firm.

The invention is a raft consisting of tubular cork bags made into a net lashed with rope. It is produced by a Cardiff ship-repairing firm. It can be unrolled down to sea level to serve as a ladder, or floated along shore to pick up a swimmer. It is in conditions which would make the launching of an ordinary lifeboat impossible.

Orders have been received from liner and "tramp" firms. The device is expected to form the basis of a new industry.

Marriage In Finland

Canadian Nurse Rejected Reported To
Have Wed Daughter Of
Tom Mix

Ruth Mix, daughter of Tom Mix, and Harry Knight, champion Canadian lasso wrestler, eloped to Reno, Nev., where they were married, said a telegram from Knight received at Hollywood by Tex Austin, promoter of cowboys' contests.

"We tied the knot to-day," read the message.

Miss Mix, whose father is famous for cowboy roles on the screen, formerly was married to Douglas Fairbanks, an actor. Their marriage was annulled at Middletown, N.Y., in July, 1933.

Knight's home is at Hanft, Ala.

New Story For Ripley

Here's one for Ripley, "Believe It Not," but it's a fact anyway. A. W. Youngblood, of Oxford County, N.Y., found a large potato with others in his cellar that had started to sprout. Nothing unusual in that, but the sprout had turned around and gone into the potato again near the surface, coming out at the other end, extending for about two inches.

A Fish-Tail Suit

What are the functions of a lieutenant-governor? asks a constitutional writer. In Manitoba, says the Winnipeg Tribune, the duties start daily. Borden's included, somewhere around 8 a.m., and last frequently until the clock ticks to a.m. of the following day. "Not more than a thousand organizations of one kind and another have their eyes on the governor as a prospective guest at one or more dinners."

Butterfly Hunter

Man To Travel 4,000 Miles To Pursue
Life-Long Hobby

At the age of 75 Walter Dammit, a retired business man of London, will leave shortly to travel a thousand miles up the Amazon in pursuit of his lifelong hobby of butterfly collecting.

Mrs. Dammit has a remarkable collection of butterflies and moths, numbering more than 38,000, and he hopes to add to it considerably as the result of his new venture.

It kept up by cycling. "I have had the same machine for 30 years, and have traveled more than 100,000 miles on it. One week-end I covered more than a hundred miles."

Before I bought my present machine I had the first safety bicycle in the country."

On the subject of his hobby, Mr. Dammit said: "Some of my specimens come from as far as the Solomon Islands. The collector who secured them was repeatedly driven off by cannibals in attempting to land. He at last succeeded by brandishing a revolver."

Boosting Bay Route

First Vessel To Be Chartered For
1935 Season Is The Ashworth Of
The English Lake

Announcing the Ashworth of the English lake is the first vessel to be chartered for the 1935 season. Bigg's On-the-Water Association, at Winnipeg, forecast a record year for grain exports over the Hudson Bay route.

More ships would visit Churchill, Manitoba's northern seaport, this season than any season previously, General Patterson said. Judging from the numerous inquiries received from persons in different countries, General Patterson said many tourists would visit the port this year.

The Ashworth will leave England in time for the official opening of the Hudson strait and is expected to dock at Churchill shortly after the opening date, August 10. The Ashworth will bring cargo to Churchill from Newcastle, Antwerp and Liverpool.

Royal Military College

List of Western Graduates, And
Those Receiving Diplomas

Corporal Ian Mandel Drim, Victoria, B.C., graduated from Royal Military College with honors.

Other Western cadets who graduated are: Cadet Gordon Dale Macmillan, Regina; Cadet Edward Macmillan, Regina; Cadet C.M.B. John Alexander Hornibrook, Calgary; Cadet John Donald, Victoria; Cadet Mary Louise Macmillan, Calgary; Corporal Ronald Edward Wilkins, Penikese, B.C.; Cadet George Ross Davidson, Cadet, Alta.; Cadet Robert Summers, Regina; Cadet John Henry Desmond Barrett, Victoria.

The college will be awarded diplomas after satisfactory passing supplementary examinations: Cadet Thomas Alfred Morrison, Victoria; Corporal William Carroll Patterson, Calgary.

For Anglo-American Amity

Eight Thousand Former Residents
Of British Empire Held Gathering
At Los Angeles

Upwards of 8,000 former residents of the British Empire, enough to make a small city, packed at Los Angeles, California, in observance of the silver jubilee of King George.

The outdoor luncheon grounds of Lincoln park saw a gathering of people from all parts of the empire. Francis E. Evans, British consul and guest of honor, pleaded for Anglo-American amity and declared that at such a season of English rejoicing international ties should be even closer than former British subjects here and abroad. John Tappan, vice-president of the Sons of St. George, was another guest of honor.

Started Apple Industry

On the Belle Isle near Annapolis Royal, Nova Scotia, Pierre Martin planted several small trees 300 years ago, which he had known to be new world with him from Normandy. From this small plantation, the famous Annapolis valley apple industry arose.

Alice Brooks Patterns

An Announcement Of Interest To
Women With Artistic Tastes

Women who have these days plug their knitting and crochet needles turning out beautiful articles that vie for honors with their Grandmother's efforts. Wherever you go—to tea parties, bridge games or social gatherings—you see women wearing knitted mitts, sweaters, dresses, and suit costumes. The fashion designers in Germany and the salt waters of Michigan and Ohio are aware time, they will tell you; and the same. You can. And you can save so much money, by not anything of a pleasant pastime.

We are very happy to announce that we can offer the Alice Brooks Needlecraft Service to our women readers. A service exclusively of interest to women with artistic tastes. And what woman has not a taste for the dainty and artistic?

Dame Fashion declares that accessories must match. In line with this ultimatum, our new service will offer matching hats and purses, gloves that can be worn with matching skirts, sweater coats for sunlight and starlight. Charming two-piece knitted suits with exquisite tailoring and clever hand-drawn details that will make the envy of all your friends.

Miss Brooks' creator of this service, also will provide design for the needleworker. Quick patterns in every design as Spring Fashions, Cleopatra's Fan, Rainbow Square, and the design for the Atlantic coast for the extraction of bromine from the sea. The success of this venture has suggested the possibility of extracting gold from sea water in a similar fashion.

Bromine is a dark-red fuming liquid with a very disagreeable odor. Bromine vapor attacks the eyes very painfully and produces great irritation when inhaled. It is about three times as heavy as water and is moderately soluble in water. Bromine is compounds produced when bromine combines with other elements. Those of potassium and sodium are used in medicine as sedatives and in the preparation of silver bromide, which is used extensively in photography as the sensitive material on the plate. Bromine is also used in the preparation of important dyes. Considerable quantities of bromine are used in the manufacture of tear-gases, or lacrimators.

Get's Ruse Fools Thief

Receivers Jured From Robber By
Clever Trick

A young woman in Shanghai, China, who refused to be alarmed when a thief snatched a pearl earring valued at \$1,000 from her ear, fooled the thief by a ruse so clever as it was daring. As he called to run away, the woman reached for the earring which he had snatched to him: "Here," she cried, "you might just as well take the other one. I only paid \$2.50 for these." The robber, hurrying away in a moment of inactivity at her and all other women who were imitation jewelry, was so taken by the ruse that he had snatched into the street and left.

Tuberculosis Seals

Receipts Twelve Per Cent. Higher
Than In 1933

Receipts from the Christmas seal sale for the Canadian Tuberculosis Association were 12 per cent. higher in 1934 than in 1933. It was reported to an association meeting at Toronto, Saskatchewan, New Brunswick, Montreal and Hamilton that a steady increase.

Members in Canadian sanatoria and clinics, for 1934, follow: Dr. C. F. Bennett, Port Nash, Sask.; Dr. A. H. Boyd, Vancouver.

Little Journeys In Science

BROMINE

(By Gordon H. Quist, M.A.)

Bromine was discovered about a century ago by the French scientist Balard. The element occurs in nature as bromides chiefly as magnesium bromide and sodium bromide, which are found in many springs and salt deposits. The element is a reddish-brown liquid in Germany and the salt waters of Michigan and Ohio are richest in bromides. Sea water also contains small amounts of bromides.

Bromine is prepared commercially by the electrolysis of a solution of a bromide with the more active element chlorine.

In recent years the demand for bromine has greatly increased, due to its use in the preparation of a compound called ethylene bromide. This compound is a constituent of ethyl gasoline. An effort is being made at the present time by scientists to obtain additional supplies of bromine from the bromides in sea water. Sea water contains about seventy parts of bromine in a million of water, which means that about 2,000 gallons of the water must be treated to secure a pound of bromine. To recover bromine from sea-water, a ship was equipped capable of recovering 100,000 pounds of the element per month. It has been reported that the trial trip of this vessel was quite successful, and as a result of this rather large sea experiment a plant has been built on the Atlantic coast for the extraction of bromine from the sea. The success of this venture has suggested the possibility of extracting gold from sea water in a similar fashion.

Bromine is a dark-red fuming liquid with a very disagreeable odor. Bromine vapor attacks the eyes very painfully and produces great irritation when inhaled. It is about three times as heavy as water and is moderately soluble in water. Bromine is compounds produced when bromine combines with other elements. THURSDAY, JUNE 11th 1953

TOWN OF REDCLIFF

"The Local Tax Arrears Con-
solidation Act 1953"

The Council of the Town of Redcliff have passed a By-law declaring that the above Act will be applicable to the Town of Redcliff and said By-law has been approved by the Minister of Municipal Affairs in writing. All consolidated arrears of taxes shall under this Act be payable by five equal annual installments together with the current taxes on or before the 15th day of December except as hereinafter mentioned.

The following persons may make application to the Council to come under the provisions of the above Act.

Any person firm or corporation who is the owner of any parcel of land in the town of Redcliff against the title of which there is a subsisting notification for arrears under "The Tax Recovery Act 1929."

Any person who has been a bona fide resident of the Town of Redcliff for 12 months immediately preceding the date of his application, in the case of lands which have been finally acquired by the town of Redcliff.

In such cases where the applicants property is to be exposed for sale at the forthcoming Tax Sale on August 24th, 1953 such applicants should make their applications in time for the council to consider same prior to that date.

Upon receipt of the application the Secretary Treasurer shall calculate the amount required to pay the arrears of taxes if the same were consolidated and the applicant shall deposit with the Secretary Treasurer one-fifth of such sum

In such cases where the application to consolidate is made after the 15th day of November 1953 the applicant shall also deposit with the Secretary Treasurer sufficient to pay the current years taxes.

In any event the current years taxes shall be paid by the applicant on or before the 15th day of December.

When the application is granted the deposit shall be applied to the applicant's consolidated arrears otherwise it shall be repaid to him.

In case the application is not granted provision is made for said Act for an appeal to the Minister of Municipal Affairs.

The Council may on the applications in writing of any person liable under a consolidated agreement under this Act and with the approval of the Minister, by resolution, extend that agreement for one year and have payment of the installment payable under the agreement for any one year of the years for which such agreement is made in case it is thought proper so to do by reason of crop failure or other circumstances.

No buildings fences fixtures or other improvements shall be removed from any land in respect to which there is a subsisting tax consolidation agreement.

To those who properly come

under the provisions of the above Act all proceedings under the Tax Recovery Act 1929 are suspended in respect to the properties involved while such consolidation agreement is in force.

THE NEWEST SENSATION! CARS GREASED

Under Actual Road Conditions
Increase the Life of Your Car—Decrease Repair Bills
SWAY SQUEAKS AWAY WITH
MOTO-SWAY

Lubrication Under Actual Driving Conditions
This Amazing New Service is Invaluable to Every Grease Job
Drive in — See it Work

WE raise the body completely off the chassis with contact jacks, which jacks contact the frame at the center.
WE Pull the spring leaves back into their natural curl—we call it "Temporary Re-arching."
WE Use the proper lubricants, whose the ACTUAL WEAR takes place—the highest points of friction.
WE Do thorough lubrication, which means more than pumping grease through high pressure guns INTO OPEN CAVITIES.
WE Periodically lubricate, apply grease while the car is in motion and while the weight of the body is on the motor spring.
WE Locate the Hidden Body Springs, we detect faulty parts.
WE Spread spring leaves to actually put lubricants between the leaves—not just smear on the outside.
WE Free frozen shackles without the aid of a "Crow Bar." The use of a "Crow Bar" is DANGEROUS.
WE Examine and refill shock absorbers which can only be done with MOTO-SWAY. (Optional at slight additional cost.)
WE Lubricate "Knee-Action" cars. See it work, it's perfect while the parts are all in motion—"Floating action."
WE Lubricate the "Rocked Springs." How else can you do it? Only with MOTO-SWAY.

WE Change Your Oil in the Drankness with MOTO-SWAY; all old oils and milliums come out, then keeping repair bill low.

WE Make old car ride like new ones, keep new ones riding like new ones. We put it in.

WE Challenge any other means of lubrication: the old stationary method has become obsolete. The MOTO-SWAY method is the only correct way to Lubricate Your Car.

We are giving you this Guarantee and certified Moto-Sway Greasing and Lubricating Service at

SAVE

WE'VE heard a lot of that word "save" in the past few years. For some time now the question of saving our pennies and dimes has not only been important—but imperative.

Also, it may be noted that everyone who is in the business of selling merchandise to the public has devised his attention to pointing out how much you, the customer, can SAVE by dealing with him, to the exclusion of others. Which is perfectly all right, too, in his way, except that it is advisable for a customer in his own interests to be sure that the service that he is getting are real and not simply over-embellished on the advertiser's part. In other words to save where it SAYS to save, to save, for instance at KATON'S, where value means not simply cheapness—but quality at a price—and where every claim regarding merchandise is backed by an iron-clad guarantee of satisfaction that makes every purchase doubly safe. It's natural to want to save—but it's wise to remember that "It SAYS to save at KATON'S."

"The Unknown Port," etc.

SYNOPSIS

Nancy Nelson is a mid-die, a gay, irresponsible girl of nineteen, with no care beyond the next party, and one time for her coming-out party. Suddenly, in the market crash, her father loses his home and his family is faced with the necessity of a fatherless child. At this juncture a letter is received from an eccentric relative in Colorado, who offers the girl a home on what seems to be impossible conditions.

After much consideration Cousin Columbine's offer is accepted, and Nancy and Jack arrive at Pine Ridge. Now Go On With The Story.

CHAPTER V.—Continued

"But she had on old stockings, Jack, and high-heeled slippers! They looked so incongruous with all the rest of her. Well, that'll be something to write home about. I wonder if we ought to go inside. Do you know, I-I feel sort of nervous, just like whenever's coming for us would come and get us with."

"Let's go right in, this air's so marvellous. Do you suppose they often get such days in winter? Watch out, sis!" Jack lowered his voice. "Clutch onto the old dame in the fireman's shirt."

Nancy smiled, eyes following her brother. A white-haired man had just emerged from the station. She wore a broad-brimmed black felt hat much like a mark, while her long black cape, being unfastened, revealed a misty blouse of flaming red. Her feet were clad in stout, black, lace-up boots, above which a pair of cotton stockings met a dark cloth skirt. An eccentric figure, taken as a whole. And yet, Nancy whispered as she passed them hurriedly, "who has an air about her. See what I mean, Jack?"

"Yeah," he admitted, "but I bet she's a crank of some sort, just the same. You know, what they call a—character. You bet she is!"

Jack paused. The eccentric lady had turned and was approaching rapidly. "I'm looking for two young people by the name of Nelson," she cried, "Have I found them?"

"The question was as unique as the woman; but at that moment her somewhat maniacal countenance was lighted by a contagious smile. Jack actually grinned, while Nancy responded quickly: "Ti looks as if you had! Did Cousin Columbine and you to meet us?"

A quick nod answered her. "I dare say you're hungry as two bears, and so am I. Come in and eat. These Eastern trains always arrive at noon time, and you must be hungry."

Still talking, she led them toward the station restaurant and motioned to a diner at the counter.

"Do us in paying a dollar for a dinner when you can get a hot roast beef sandwich for fifty cents. Do you like roast beef? Here's nothing better. Do you want coffee? They say it's bad for people but I've drunk it every day for

HEALTH MEANS CHARM AND HAPPINESS

Sparkling eye and smiling lips speak of health and vitality. Clear skin attracts. The beautiful girl is both happy and healthy.

Remember that 99 out of 100 women regret having lost their health. Remember that 99 out of 100 women regret having lost their health. Remember that 99 out of 100 women regret having lost their health. Remember that 99 out of 100 women regret having lost their health.

more than fifty years and am still able to get stout." She smiled at the waitress, and not giving the young couple a chance to answer, she ordered: "Roast beef sandwiches, coffee, lunch meringue pies for three, please, and take your time."

Struck dumb by this breezy individual, Jack stifled a smile and gave his sister a disconcerting glance. Their escort had hung her eyes on a nearby book, and was a noticeable figure in her broad felt hat and red blouse. People who take a little, mildly amused; but there was nobility in her weathered countenance, and her smile was winning.

Lunch was quickly served, and there being no privacy at the counter, was consumed in silence save for a few questions regarding their journey, as the train pulled away from the station, both boy and girl turned to find it, feeling a subtle friend were meeting them; and as Nancy resumed her meal their companion added: "I'd like to see the report without you."

"I suppose I shall," replied the girl, and added at this unexpected insight into her mind: "You can't feel as if the last bridge behind us was burning. Everything's so different from Massachusetts; and not knowing Cousin Columbine at all I'm pretty enough to be a little nervous."

The woman smiled one of her rare smiles. "You needn't be. I don't think you'll find Columbine Nelson hard to live with."

"Have you known her long?" Jack asked, looking at her with a bit of light on the character of their union.

"All my life. She was born at Pine Ridge seventy odd years ago in a covered wagon."

"I know," said Nancy. "It's one of our family stories, and that's how she happened to be named."

"It is indeed!" The woman tipped her waitress and glanced up quickly. "Oh, there you are, Mark!"

"Yes, there you are, Mark!" she called. "You're almost ready now, and as she slipped from the high stool Nancy saw a tall young fellow in a samovar which he returned, just before the great war started over in Europe. I remember the date because I was christening the ship with the new name, Aurora. Her father married a German, Otto Welmuller, up at Cripple Creek, and as a good fellow as ever lived, came rushing up with the party. She actually pounded on the door, and shouted: 'Miss Columbine! Miss Columbine! Here's your sister!'"

"This is Mark Adam, who is to drive us up," explained the lady. "Mark, these young folks are Nancy and Jack Nelson. They are your first cousins. I presume you're both brought luggage. And where's Matthew, Mark?"

"Yeah," he admitted, "but I bet she's a crank of some sort, just the same. You know, what they call a—character. You bet she is!"

"Yeah," he admitted, "but I bet she's a crank of some sort, just the same. You know, what they call a—character. You bet she is!"

"Yeah," he admitted, "but I bet she's a crank of some sort, just the same. You know, what they call a—character. You bet she is!"

"Yeah," he admitted, "but I bet she's a crank of some sort, just the same. You know, what they call a—character. You bet she is!"

"Yeah," he admitted, "but I bet she's a crank of some sort, just the same. You know, what they call a—character. You bet she is!"

CHAPTER VI.

If their unconventional relative had set out a bench and blown the old Ford, turning it into a million bits, she wouldn't have created more surprise, and taken your time."

"Over seventy, I'll admit," alleged their companion, her eyes twinkling. "but not so much as she looks. I believe, Stop staring at me, Jack. If it's the middle house you'll just have to get used to it. The lady's a life-saver in a place like Pine Ridge where there's no dressmaker. I've come with my joy when they came into fashion years ago and I shall continue to wear them, fashion or no fashion, as long as they can be bought by mail. The red ones are for gala occasions like the present. Usually I wear blue. Here comes our driver. Will you kindly testify that my name is Nelson, Mark? These young folks seem to be unbelieving."

Mark Adam laughed as he swung into the driver's seat. "It's unless she got married when I was a boy, I don't see how she could be two hours back," he stated. "I saw that cop give you an admiring glance, Miss Columbine."

"Admiring?" a feminine Nelson sniffed contemptuously. "It's more likely he was thinking: 'There's that old lady who's been married for two hours back!'"

Keep Record Of Graduates

Careers Of Alberta's Commercial University Graduates Followed Up

Business men of Alberta, who seek university graduates for their office or field staffs, will be aided by the information that will be given by the direction of Dr. W. C. Wallace, president, leading firms will be given information about the qualifications of graduates seeking a commercial course in life.

Investigation into careers of the university's school of commerce graduates resulted in reports on 97 of the 127 men and women graduates having been traced to their present positions as of July 1, 1933. They are employed in Alberta, Toronto, Vancouver, the United States and one in Honolulu.

Some have taken up teaching; others are engaged in secretarial work; in the Canadian trade commission offices in general commercial fields. One graduate took up farming.

A BARBER WHO HAD RHEUMATISM

Tells How He Carried On

A barber who had been "a martyr to rheumatism" for some ten years. For five years I was so afflicted that it was with the greatest difficulty I was able to carry on my business. I may say I am a barber by trade. After having tried numerous remedies, I was finally advised by Dr. Krusch, I am pleased to say that after having tried Krusch's remedy for some months, I am now free from aches and pains that I have been for some ten years. In fact I consider I am cured of rheumatism, thanks to Krusch's Balm."—W. M.

Two of the ingredients of Krusch's Balm are the most effective solvents of salts known to medical science. They swiftly dull the sharp edges of the painful crystals, then convert them into a harmless solution. Other ingredients of these salts have a stimulating effect upon the blood, and assist in the removal of the dissolved uric acid through the natural channels.

Little Helps For This Week

"He health the broken in heart and bindeth up their wounds. He telleth the number of the stars and calleth them all by name. Psalm 147:3-4.

Teach me your good word of patient stars. Who climbeth which has reached no star. Leaving on space no shade, no trace of any, no fear to die.

Look up to the heavens and the question the stars would seem to reproach you. "We are sure up here" they seem to say, "we shine fearless and content, for the God who gave the principles of our lives leaves to hide it from the blast of unloving springs hangs us in the awful hollows of space. We cannot tell our year in safety. Lift up your eyes on high and behold; who hath created these things, the things which they call by name? By the greatness of His might, for He is strong in power, not one fails."

Success In Business

Depends Very Largely On How Hard One Works

There is altogether too much nonsense talked about business. The world is full of theorists, men who can tell others how a business should be operated, but who have never been able to make a success of themselves. To conduct a business successfully three things are essential: money, ability, and a tremendous capacity for hard and strenuous work. It is the last of the three which the principles of the greatest part to the success of a business, but it is a wise combination of the three which provides work for hundreds of thousands of men and women all over Canada.

A gooseberry bush bearing a fuchsia flower was among the rarities exhibited at the Royal Oxfordshire Horticultural Society's Show.

NEW PATTERNS ON Needlecraft NOW AVAILABLE

ON another page you will find the latest of the Alice Brooks Needlecraft Patterns. They will include everything about knitting, Alt press patterns, etc., as time goes on. We hope you will like this feature and the patterns are only in the early stages of instruction.

THE RHYMING OPTIMIST

By Aline Michaelis

GREAT JOYS

Laughter is for little joys. Childhood's thoughtless mirth. All the bubbling merriment of the world is in the mirth. Words are for the joys that last.

Revered With Fortune

Lonely Bachelor Leaves Little Niece Home And Money

Because she looked after the old bachelor when he was dying, the 25-year-old daughter of a family at Quilom Beach, B.C., has now a fortune of \$20,000.

For five months Benjamin Mulder had been sick. Every day the girl would go from her home, close by the old man's house, to the hospital and look after his needs.

A short time before his death the girl told him little news that he would leave her his house and two acres of land on which it stood. He never told her of the fortune he was to have. In fact, no one in the district thought that he had any money.

When the old man died and was buried, the will was read. His whole estate, which included the house and grounds and \$20,000, was left to the little nurse, who is the oldest of five children.

British Film Stars

Leave Hollywood in Compliance With Immigration Regulations

Foreign film players have to watch the United States immigration requirements closely. Two of them, Thomas Clark and Gerry Maro, have been refused entry into the United States.

Keep Record Of Graduates

Careers Of Alberta's Commercial University Graduates Followed Up

Investigation into careers of the university's school of commerce graduates resulted in reports on 97 of the 127 men and women graduates having been traced to their present positions as of July 1, 1933.

Some have taken up teaching; others are engaged in secretarial work; in the Canadian trade commission offices in general commercial fields. One graduate took up farming.

The cost of living, which reached its peak in 1920, has declined but on the 1913 basis it is still much higher than the price of gasoline. In 1934 the cost of living was 20.7 per cent. higher but the price of gasoline was 28.4 per cent. lower than in 1913. The data for this graph are based on figures published by the Dominion Bureau of Statistics.

**LIVING COSTS MORE BUT
GASOLINE COSTS LESS**

THE cost of living in Canada in 1934 was approximately 21 per cent. higher and the price of gasoline 28 per cent. lower than in 1913. The price of gasoline never rose to as high a peak as did the cost of living. Since 1920 gasoline prices have declined almost continuously to the present low level.

Imperial Oil has always sought for economical ways of doing business and has always passed on to the consumer the benefits of such economies. Imperial Oil operates on a very small profit and in 1934 earned an average of slightly more than one-half of one cent per gallon on gasoline.

Not only is gasoline cheaper than ever—it is better than ever. Imperial Oil research laboratories played a leading part in developing fuels for modern motors. Imperial gasoline of 1935 is a far better gasoline than that of 1913 yet it sells at a price considerably lower.
